

Arrowhead Stadium Improvements

Truman Sports Complex

Kansas City, Missouri

Principal-In-Charge:
Leonard Graham, PE

Project Manager:
Kurt A. Mitscher, PE
Bob Gregor, PE

Projected
Construction Cost:
\$300 Million

Projected
Delivery Date:
July 2010

The Arrowhead Stadium Improvements project involves construction of major new concourse expansions on all four sides of Arrowhead Stadium, including mass grading and relocation of major infrastructure (e.g., sewers, major power lines, and water mains).

Located in the Truman Sports Complex, Arrowhead (and Kauffman) Stadiums are to remain open throughout the construction period, dictating careful planning for public use during infrastructure improvements.

Taliaferro & Browne, Inc. is currently providing all civil engineering services, including master planning and preparation of construction documents for all streets, pedestrian paved areas, storm sewers, site layout, site grading, utilities, and erosion control.
